AUTOMATE YOUR STORE.
EXTEND HOURS.
SAVE STAFF COSTS.

A smart locker system that transforms how you operate with 24/7 drop off and pickup, even when your store is closed.

GET QUOTE AND IMPLEMENTATION PLAN

ONE TIME SETUP. YOUR BRAND. REDUCE LABOR IN WEEKS.

Stores Lose Money When Staff Go Home.

Your storefront is locked, but customers still want to drop off and pick up. Manual handovers eat time, shrink margins, and limit service hours.

Smart lockers create a 24/7 unattended flow with minimal change to your model. Extend hours, reduce staff dependency, and improve customer satisfaction without refitting your whole operation. Guidance on installation, branding, and software setup is included.

Results That Move Your Bottom Line

- **+15 hours** open per week equals about 10 more weekly orders

- **$480/week saved** in staff equals more than $25,000 yearly savings

- **100%** automated flow, integrated with your system

- Most stores recoup investment in **6 to 9 months**

Modeled improvements from after hours pickup enabled through locker automation. Results vary by store size, location, and software integration.

Built By Operators, For Operators

Since 2012, we have helped laundromats and dry cleaners modernize operations with smart locker automation.

- In market since 2012
- Stores automated in 7 plus countries
- Trusted by more than 100 operators
- Works with CleanCloud, Cents, SMRT, MyLockers

How It Works

For Customers

Step 1. Place items in a locker during or after hours
Customers create an account, find an empty locker, place their garments inside, and follow the lock instructions printed on the door.

Step 2. Submit the order in the app
They order through your software exactly as they would at the counter.

Step 3. Receive automatic updates
System notifies them by SMS, email, or app when order has been cleaned.

Step 4. Collect anytime that suits them
They retrieve their order using the pickup code and locker number.

For Drivers Or Staff

Step 1. View daily pickup list
Staff or drivers check their list of locker orders inside the admin or driver app.

Step 2. Access lockers and collect items
They open lockers with an RFID key or code and bring items in for cleaning.

Step 3. Load finished orders into open lockers
Cleaned garments are returned to any available locker and secured.

Step 4. Trigger customer notifications
The system instantly alerts customers that their order is ready for pickup.

Store Owners

Step 1. Choose locker setup and sign your Letter of Engagement
Select your locker type and quantity. Once you sign your LoE and place the deposit, we prepare your software setup, decals, and installation plan.

Step 2. Install lockers and activate after hours workflow
Lockers arrive branded and ready to bolt together inside your store. You set up signage, support channels, and customer instructions.

Step 3. Monitor orders through your POS or MyLockers
All orders appear in your dashboard. Payments, notifications, and locker activity are fully automated in the background.

Step 4. Reduce attended hours and extend store access
You operate 24/7 for drop-off and pickup with no added staff, lowering labor and improving convenience.

What Makes Breezy Different

✔ Breezy Laundry Lockers	✖ Other locker suppliers
• 12+ years of operator experience	• Factory built with little operational know how
• Software and business integration	• Hardware only
• Custom marketing and location support	• No expansion guidance
• Modular, relocatable steel lockers	• Fixed installs
• 5 year warranty and resale value	• Limited or no warranty
• Proven ROI model and tools	• No profit guidance

Locker Type Decision Matrix

Pick based on your service mix and space.

Your primary service	Best locker choice	Why it fits	Typical install notes
Wash dry fold is most of your revenue	WDF Locker	Three compartments per unit handles bulky bags efficiently	Place near bag shelf and scale
Dry cleaning is a major share with hanging garments	Long Door Locker plus Multipurpose	Full height doors protect creases; multipurpose covers mixed orders	Mount a garment bar at loading zone
Mixed service in a small footprint	Multipurpose plus Express Box	Two compartments for mixed orders; Express Box absorbs peaks	Position Express Box closest to entrance
Many repeat daily users and small drop offs	Express Box plus WDF	Speeds drop offs and avoids compartment shortage	Add large QR decals for speed

Multi-Purpose Laundry Locker

When you want to offer wash dry fold and dry cleaning

Price: Depends on quantity (pricing table below)

Gas powered hinges minimising foyer disturbance

Dual Z-interior for longer garments

High quality electronic RFID locks

Reinforced hanging bars for large orders

Thick steel for durability

Square doors with no screws or rivets

Elevated kicker to prevent drag

Key Specifications

Dimensions: 15.4 inches wide (390 mm), 23.6 inches deep (600 mm), 78.7 inches high (2000 mm).

Interior hanging height: 37.4 inches (950 mm)

Battery operated: Runs on long-life AA batteries with 3+ years expected lifespan.

No internet required: Locks operate without WiFi or external connectivity.

Modular design: Lockers bolt together easily, allowing you to add or remove units as locations grow.

Wash Dry Fold Laundry Locker

When you want to offer wash dry fold only

Price: Depends on quantity (pricing table below)

Custom Wash and Fold Locker Decals

Easy, Clean Decal Installation

Laundry Locker Pricing

Most stores only require 5 to 10 lockers to automate drop off and pickup. Below is the estimated price per locker, delivered anywhere in the United States.

$550 to $600 / locker

Includes the locker unit, electronic RFID locks, and delivery to your door in the United States. There is also a one time 88 dollar protective crating fee added to the order for safe transport.

What You Get With Each Locker

✔ Fully assembled steel locker
✔ High quality electronic RFID locks
✔ Battery powered system (no WiFi needed)
✔ Ready to bolt together inside your store
✔ Designed for wash dry fold, dry cleaning, and after hours pickup

Pricing varies slightly based on your exact delivery address in the US.

Will My Current Software Work With Lockers?

Keep, switch, or add. Pick your path below.

Your situation ➡️	Your Path ➡️	Outcome ➡️
You already use CleanCloud, Cents, or SMRT with a locker module	Keep your current system	One login and no retraining. We connect lockers to your account.
You use another POS and are open to switching	Migrate to a locker ready platform	Unified orders, routing, and payments in one place.
You want to keep your POS and run lockers separately	Add MyLockers for lockers only	Locker ops stay simple while your POS remains unchanged.
You are starting fresh	Start with MyLockers	Built for lockers and easy to scale across sites.

Tech notes

Breezy locks run on batteries with expected life more than 3 years and do not require Wi Fi, which reduces points of failure and makes installs faster.
